VANGELIS SOLUTIONS LTD

The Top Ten Business Benefits Of Managed Services

The business benefits of managed services have been promoted for nearly a decade. Vangelis Solutions fully appreciates what these benefits can bring to your business and devised the Vangelis SupportAdvantage™ to help you achieve these goals in your business.

1	Fixed monthly cost & control management	Vangelis Solutions will perform a free one hour audit of your IT and/or Telephony to give you a fixed month cost so you can accurately plan your technology budget. With our two & three year contracts, we will also include a budget & plan for your business so you know where your business is going.
2	Managed Expansion & Growth	As you expand, you will know what your costs will be & can therefore plan accordingly.
3	Best Practice Driven	We invest the time to find out how best to do something, thereby giving you peace of mind.
4	Selected Best-in-Industry partners	With over 20 years in IT, we know where & how to source the best partners in the industry where it is Voice over IP or traditional Telephony or new cabling for an office move. Good partners & Good Management make for long term Business Success.
5	24/7 monitoring, alerting & support	Using our unique systems management framework, the Vangelis SupportAdvantage™ can monitor & alert us to events on your network so that they can be dealt with quickly.
6	A Proactive Service with Security as Standard	Preventing a problem from developing or identifying an issue that can be dealt with in a planned way will save you time, money & hassle. Security is standard, not an optional extra.
7	Management and Status Reporting	The support calls, the computer updates, the alerts... everything is logged. This means we can produce or customise a report for your needs.
8	Inventory & Site Assessment	With a few clicks of the button, we can produce a report to give you the kind of inventory & site assessment you need.
9	Automation & scheduling	There are numerous technical jobs (such as application deployment & routine tasks) that can be scheduled to run whenever you choose, silently & without intervention. We can do that!
10	Productivity Gains: Reliability, Consistency, Performance	It's hard to put a value in your spreadsheet but you know when things are running well & smoothly.

That's the Vangelis SupportAdvantage!™

Call **Vangelis Solutions** now on 020 3051 1740 to arrange your free one hour meeting to discuss your business' Managed IT and Telephony requirements.
